MIRACLE IMMANUEL SUMAJOW
Bachelor in Informatics Engineering | Software Developer
Manado, North Sulawesi | +62 852-4287-6897 | miraclesumajow32@gmail.com | Linkedin

SUMMARY

Fresh graduate in Informatics Engineering. Well-versed in software design, programming, and databases, also with Microsoft and Google Workspace. Deeply passionate about continuous learning in the field of software engineering. Additionally, Possesses well-developed soft skills in public speaking, communication, and management. Seeking opportunities to contribute to a company's growth and further develop expertise in a professional environment.

TECHNICAL SKILLS

Programming Languages: Go, TypeScript, JavaScript, PHP, Kotlin, Dart, C#, SQL
Frameworks & Libraries: Next.js, React, NestJS, Laravel, Flutter
Databases: PostgreSQL, MySQL, Mariadb, SQLite
Platforms & Technologies: Android Studio, Visual Studio Code, Firebase Cloud Messaging, Node.js
Testing: Appium, Selenium
Tools: Git, GitHub, GitLab, Docker, Postman, Swagger/OpenAPI

EDUCATION

Universitas Sam Ratulangi **Manado, Indonesia**
Informatics Major - GPA 3.91/4.00 – Cum Laude *August 2022 - July 2026*
Thesis: Multi-Platform Student Correspondence Administration System Based on Role-Based Access Control and Real-Time Notifications

- Developed a multi-platform correspondence administration system using Next.js, Go, and PostgreSQL to support digital student letter-request and approval workflows.
- Implemented Role-Based Access Control (RBAC) to separate permissions across student and administrative roles.
- Integrated Firebase Cloud Messaging (FCM) to provide real-time notifications throughout the correspondence workflow.

Relevant courseworks: Web Programming, Software Engineering, Database & Database Technology.

EXPERIENCE

Siloam Hospitals Manado
IT Intern
June 2025 – August 2025

- Identified the need for more structured doctor schedule management and developed a web-based scheduling system using PHP, JavaScript, HTML, and CSS, implementing CRUD, search, filtering, and schedule-status management.
- Supported daily hospital IT operations through hardware/software troubleshooting, printer maintenance, employee access-card systems, IT asset management, and Raspberry Pi-connected TV systems.

Engineering Faculty
Assistant Lecturer - Database Technology
October 2024 – December 2024

- Assisted practical sessions covering database design, security, authentication, replication, partitioning, concurrency control, and optimization using PostgreSQL and Oracle.
- Guided students in applying database concepts through practical exercises and implementation.

Assistant Lecturer - Programming
March 2026 – May 2026

- Supported programming course activities through assignment evaluation, score management, administrative coordination, and collaboration with fellow teaching assistants.

LEADERSHIP & ORGANIZATION

UNSRAT IT Community *April 2023 – July 2026*
Member of Community
Backend Division Coordinator
March 2025 – April 2026

- Coordinated event preparation, logistics, external contributors, performers, and event personnel to ensure activities were executed according to plan.

Himpunan Mahasiswa Elektro *May 2023 – July 2026*
Member of Association
Vice-Coordinator - Event Division, Social Service
June 2023 - August 2023

- Coordinated a 5-session backend learning program for university students, with an average of 10 participants per session.
- Designed the curriculum and study schedule, assigned session PICs, prepared session rundowns, and developed assessments to evaluate participants' learning progress.

Vice-Coordinator - Event Division, Pre-Christmas Event
August 2023 - December 2023

- Coordinated event planning and execution across divisions, including scheduling, logistics, venue preparation, personnel, and event operations.

PROJECTS

UNSRAT IT Community
Backend Developer – Spark
July 2024 - November 2024.

- Developed backend services using Go and NestJS, implementing REST API endpoints within a collaborative software development workflow.
- Supported API documentation and integration using Swagger/OpenAPI.

Backend Developer – Report Formatter
July 2024 – November 2024 | January 2025 - April 2025.

- Developed RESTful backend services for chapter, subchapter, subpoint, image-management, and file-download workflows.
- Refactored existing APIs, standardized API responses, strengthened security practices, and maintained structured backend code to improve consistency and maintainability.
- Created and maintained Swagger/OpenAPI documentation for API integration and team development.

Senior Backend Developer – E-Voting
June 2025 – February 2026

- Contributed to the development of an E-Voting application as the senior developer in a backend team of one senior and two junior developers.
- Coordinated backend development activities while mentoring junior developers on implementation, project workflows, and business processes.

Additional Projects
Frontend Developer – Electrical Student Association Website
March 2024 - May 2024

- Developed a responsive website using Next.js, applying reusable frontend components, responsive design practices, and Server-Side Rendering (SSR).
- Structured the application for maintainability while delivering a responsive user experience across devices.

Frontend Developer – Information System Village
Suluun Tiga — August 2025 | Leilem Tiga — September 2025

- Developed frontend interfaces for two village information systems using Next.js, translating information-management requirements into responsive and maintainable web applications.
- Applied Server-Side Rendering (SSR) and frontend architecture practices to improve application structure and maintainability.

Fullstack Developer – Siklusku
July 2026 - September 2026

- Developed an MSME accounting and digital storefront platform using Laravel, Blade, Tailwind CSS, and relational databases to digitize bookkeeping and business management.
- Implemented double-entry accounting with automated Debit/Credit validation and generated General Ledger, Trial Balance, Balance Sheet, and Income Statement reports with dynamic date filtering.
- Built a lightweight Vanilla JavaScript + HTML5 Canvas image editor supporting pan, zoom, crop, and dynamic aspect-ratio adjustment without third-party JavaScript libraries.

ADDITIONAL INFORMATION

Training:

- Junior Web Developer Vocational School Graduate Academy Digital Talent Scholarship 2024
- Operator Komputer Madya Vocational School Graduate Academy Digital Talent Scholarship 2024

Languages : Bahasa Indonesia (Native), English (Certificated TOEFL ITP 590)
